HAVING THE RIGHT COLOR IS NOT ENOUGH! YOU STILL NEED THE BEST APPLICATOR

At Automacad Concrete, we are aware that color application is a crucial step for any company in ensuring that its products stand out amid the competition, this is why we have developed a versatile system to meet any production requirement.

"The Color-I robot supports infinite possibilities in terms of color and design. The color rendition on our blocks appears more natural than ever! It surely exceeds by far my expectations in terms of steadiness and finished product quality."

*- Louis-Philippe Bernier, Plant Manager
Les Pierres Stonedge inc.*

-  **Random patterns**
-  **Up to 8 colors**
-  **Any molds design**
-  **High speed applicator**
-  **No programmer needed,
do it yourself!**

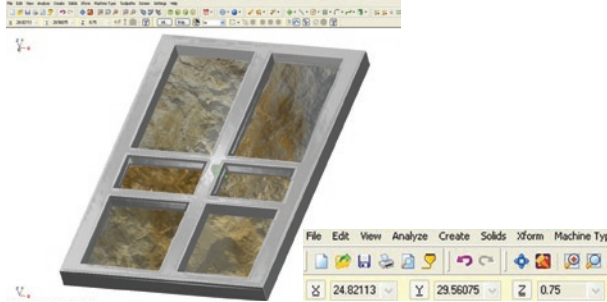

AUTOMACAD
INC

INNOVATIVE CONCRETE SOLUTIONS

Just a PERFECT and NATURAL finish

User Friendly Software Application

- Live pattern changing possibility
 - Create simple or complex robot trajectories accurately without teaching points
 - Create unlimited random and non-repetitive visual effect
 - Helps to work around reach limitations and avoids singularity
 - A sure way to beat the competition on cost, flexibility and response time!

Exceptional performance robot

- Unequaled steadiness
- Unequaled finish
- Unequaled cycle time
- For water base coloration
- RFID compatible
